Deborah Waugh is a qualified Chartered Accountant/Certified Public Accountant and a Fellow of the Institute of Chartered Accountants in England & Wales. I wrote Basic Algebra for Kids for my son who was struggling with Algebra. I found setting algebra out in simple steps and using colour helped him understand and learn the fundamental methods of algebra. Helping children build their confidence and seeing them blossom is my mission!

I bought this for my son in sixth grade who is wanting to move ahead in math and has been studying for the PSAT. It is very straightforward, easy to follow and understand, and extremely helpful in its step by step walk through of algebra. User friendly for any kid or parent and way less complicated than the detailed book in explaining the different concepts of algebra. I highly recommend the book and so does my son!,

nice...works well with my nephew

A simple step by step approach works well but there are many typos and incorrect answers in the practice sections!

helps alot
