## Customer Reviews

I bought this map before my last trip to Serbia and Balkins. I've had other maps of the area, but not reading cyrillic made them difficult for me to interpret. This one's multi-lingual and though not as detailed as I would like, the size and the detail that it does have is more than adequate for a person like me who still navigates with paper and dead reckoning. Though I do have several map apps on my devices, paper is the best way for me to travel since I can write notes on the paper and see the big picture without the confines of a smallish keyhole of an iPhone or iPad. Best of all, no cell signal is needed, no roaming charges, no tech to find your way around!

Wow I am really disappointed in this Michelin map. I have used Michelin for driving trips through France and Germany etc... and it has really saved me. No way am I depending on this one!! It is very small scale and although the paper is double folded only one side has a map. It has some main highways and no detail. I could barely find Lake Bled in Slovenia and it is the Main tourist site! To make it worse there are no blow ups of main cities. If you want a basic overview it's fine. If you want

to drive anywhere but a main road---get another map! I hope others will read this and save their money. Not my usual experience with Michelin.

Everything you need is here but it's a bit hard to find. A bit more variance in color or perhaps a stronger font would make it easier to read. It's hard to find what you want at a glance as nothing really stands out.that being said it is a good planning map but i wouldn't want to drive with it

If you are travelling by bicycle, this map is extremely useful to plan out your trip on a general scale. You could definitely use this map to guide your trip onto small rural roads. For a map of such a large area, it really covers quite a lot of detail. However, I think that for my bicycle trip I will also be adding individual country maps with greater detail.

Map is not detailed enough for seeing the smaller roads.

Very detailed and specific map that worked well for us on our drive down the Dalmation Coast.

Unless you speak one of the "Yugoslav" languages, this map is useless. The title on the cover is in English, but the entire map is in - I don't know Croatian from Serbian from Slovenian, etc., so I'm not sure what language it is - so ALL the geographical identifiers on the map are incomprehensible. The reverse is empty, so they could easily have put the English version on it. The Michelin people sure pulled a fast one on us. We pitched it and are buying another. Very unhappy about this slick bit of marketing. Never again, Michelin - I've been using your maps for decades but don't intend to do so again. Shame on you.

wish it was bigger print and show all the smaller road ways but will use it on out trip anyway.
