Customer Reviews

Jim McKenzie was the first to publish a book that combines program planning, implementing, and evaluating all in one place. A Professor at Penn State Hershey and a Professor Emeritus at Ball State University, he is a Master Certified Health Education Specialist (MCHES). He also serves as the Coordinator of the Division Board of Certified Health Education Specialists of the National Commission for Health Education Credentialing. Brad Neiger is the chair of the Health Science Department at Brigham Young University. Brad has also served in the field within the Utah State Department of Health and the National Health Institute. Rosemary Thackeray is an Associate Professor at Brigham Young University. She has revised the marketing chapter, her area of expertise, as well as the measurement chapter.

While the book is full of information, it's so much that it all starts to blend together. It's very boring with terms that have "borrowed" definitions from other sources, often more than one for each. All of these in note citations. This complicates it very much.

This book was VERY helpful with my college courses. Explains everything very clearly!

As what the product describe, thank you.

what i needed thanks!

Great resource

I rented this book to prepare for an exam. It was so user friendly to highlight, have important notes in flash cards. The technology was great. I would rent another textbook if I need to next time.

Thank you!

Excellent textbook. I'll be so glad to be done with school
