Options For Restoring Unproductive Soils: Chapter 2 Of Agricultural Options For Small-Scale Farmers

Synopsis

This publication is Chapter 2 of Agricultural Options for Small-Scale Farmers is a book filled with practical options for those working to assist small-holder farmers and urban gardeners in the tropics and subtropics, many of whom struggle to produce enough food to feed their families. How can we help the farmer who must survive on a small parcel of degraded land without water or a means to purchase fertilizer? Information is abundant, but how does one sort through it all to find out what interventions will really make a difference? This is where perspective is so important, and the best way to gain it is to connect with like-minded people who have the benefit of experience. This publication covers practical, project-oriented agricultural options for restoration of unproductive soils.
