Customer Reviews

"What I like perhaps most about Hurley's text is the organization of the material. His book introduces the material in step-by-step way building off of what was just learned the section before and adding just enough information to each section to simplify the whole process of learning logic." - David Weise, Gonzaga University
"This is the 'gold standard' of introductory logic texts." - Frank Ryan, Kent State University
"It is the clearest text, with the best technology available." - Stephanie Semler, Radford University
"Hurley's text provides a methodical introduction to the strategies and techniques usually covered in an introductory logic course, including both formal and informal topics. Numerous exercises provide plenty of opportunity for students to practice the skills they have learned." - Allyson Mount, Keene State College
"Hurley's book is thorough and very accessible to instructors and students. One of the best logic texts on the market." - Paula Smithka, University of Southern Mississippi

Absolutely indispensable in teaching logic to neophytes. Hurley's clear, concise presentation of logical concepts is easy to follow and easy to teach.

Came on time, smooth and easy purchase. The book was used, but the description of it left no surprises when it came. It was still in good shape, and very much worth the price.

The textbook seemed to be more helpful at explaining topics than my philosophy professor so it is definitely better. I was able to learn philosophy well from reading this textbook and practicing the examples after each chapter. If you ever get a bad professor, just read the textbook and you're going to be fine.

2 weeks into the class, I knew I was needing help. I dropped the class before I got the book but philosophy is my major so I have to take it and I think this set will help a lot.

Missing chapter 2&3It jump from chapter 1 to 4

Very nice book, but the front page had some foldings.

Was pretty beat up.

I bought this for my college class and was just as expected. Thank you!
