Average Customer Review: 3.9 out of 5 stars 9 customer reviews

Best Sellers Rank: #1,480,483 in Books (See Top 100 in Books) #19 in [Books > Medical Books > Medicine > Euthanasia](#) #9804 in [Books > Science & Math > Technology](#) #55187 in [Books > Engineering & Transportation > Engineering](#)

Customer Reviews

Rebecca H. Rhoades, D.V.M., has worked in animal protection since 1978. She spent seven years in private equine veterinary practice before serving as director of operations for the Hawaiian Humane Society and director of Palm Beach County Animal Care and Control in Florida. She is a consultant to The Humane Society of the United States and executive director of the Kauai (Hawaii) Humane Society.

Well written. Easy to understand. Good info included such as manufactures to order from. I could do without the history lesson of euthanasia in New York.

it help me very much in this fird

One of the books that should be in the library of those training others in the field of euthanasia.
Good information - a very handy reference!

Does its job.

I agree, sadly if we want to prevent animal abuse, pain and suffering euthanasia is needed in today's world. People that fight against euthanasia are not able to deal with reality and are projecting their beliefs and fears of death into the animals. Like it or not "No kill shelters" are being part of abuse, pain and unnecessary suffering, because the animals they turn away, when they are full, most of the animals get abandoned and abused. Thank you for writing this great book. I also, very much agree with the article in the link below.[...]

I think the thing that I appreciate most about this manual is the language that its written in. It is so easy to comprehend and uses realistic examples to inform readers as to the correct tools and routes of administration when faced with this often very difficult and sometimes dangerous task. After reading the manual myself we've now implemented it into our shelters curriculum for euthanasia training as well as made it required reading for all staff involved in the process. Thank-you Dr. Rhoades for sharing your knowlege, skill and compassion with all of us in animal welfare.

Dr. Rhoades has written a comprehensive, professional, well-organized manual for veterinarians, euthanasia technicians, shelter personnel, and those who work with animals. She considers the humane aspects, legal restrictions, personal attitudes, historical background and, and the varied methods available for many species of animals. Though sodium pentobarbital is the only legal method in New Jersey, it is important for my students to have the knowledge of all methods for comparison, understanding, and possible work elsewhere.

WHY for God's sake would anyone even sell this book? HSUS is only interested in making money, they do not donate to shelters, if any, maybe a dime of every \$10 goes to actual animal rescue. They dumped Michael Vick's dogs into a shelter and DID NOT help care for them. Join Humane Watch on Facebook to get the real story, don't let their touchy, feely, heart wrenching ads on the TV stations fool you. Their CEO states he has no problem with the eradication of ALL domestic animals. Wake up people. Wake up , don't deal with these folks, they only line their own pockets. They are a sham, a very rich one. Euthanasia is only for sick, terminal animals, not healthy animals who are adoptable.
