Biopsychology (10th Edition)

Synopsis

For courses in Physiological Psychology and Biopsychology. Explore how the central nervous system governs behavior. Biopsychology presents a clear, engaging introduction to biopsychological theory and research through a unique combination of biopsychological science and personal, reader-oriented discourse. Original author John Pinel and new co-author Steven Barnes address students directly and interweave the fundamentals of the field with clinical case studies, useful metaphors, and memorable anecdotes that make course material personally and socially relevant to readers. In addition to expanded learning objectives that guide students through the course, the Tenth Edition has been thoroughly updated to reflect this rapidly progressing scientific field. Available to package with Biosychology, Tenth Edition, MyLab Psychology is an online homework, tutorial, and assessment program designed to work with this text to engage students and improve results. MyLab Psychology is ideal for courses requiring robust assessments. Biosychology, Tenth Edition is also available via Revel, an interactive digital learning environment that replaces the print textbook, enabling students to read, practice, and study in one continuous experience. Revel is ideal for courses where student engagement and mobile access are important. Note: You are purchasing a standalone product; Pearson MyLab does not come packaged with this content. Students, if interested in purchasing this title with MyLab, ask your instructor for the correct package ISBN and Course ID. Instructors, contact your Pearson representative for more information. 0134743369 / 9780134743363 Biopsychology plus MyLab Psychology with eText " Access Card Package, 10/e Package consists of: 0134203690 / 9780134203690 Biopsychology, 10/e 0134727746 / 9780134727745 MyLab Psychology with eText Access Card

Customer Reviews

John P.J. Pinel obtained his Ph.D. from McGill University in Montreal and worked briefly at the Massachusetts Institute of Technology before taking a faculty position at the University of British Columbia in Vancouver, where he is currently Professor Emeritus. Professor Pinel is an award-winning teacher and the author of more than 200 scientific papers. However, he feels that Biopsychology is his major career-related accomplishment: it ties together everything I love about my job: students, teaching, writing, and research. • Steven J. Barnes obtained his Ph.D. from the University of British Columbia. He then worked as a postdoctoral fellow at first in the Department of Epileptology at the University of Bonn and then in the School of Interactive Arts and Technology at Simon Fraser University. He is currently a faculty member in the Department of Psychology at the University of British Columbia, where he has won multiple departmental and institutional awards for his teaching and educational leadership. His current research is focused on bipolar disorders. He is a core member and co-deputy director of the Collaborative RESEARCH Team to study psychosocial issues in Bipolar Disorder (CREST.BD) at a multidisciplinary international collaborative network of researchers, healthcare providers, people living with bipolar disorder, and their family members and supporters. When he isn't teaching, writing, or doing research, he engages in the production of traditional pieces of visual art as well as interactive electronic artworks at some of which have been exhibited at prominent international venues. He sees his involvement in the creation of this new edition of Biopsychology as a complement to everything he loves to do: teaching, writing, visual and interactive art, and research.

Amazing organization of idea- Author reminds us over and over why certain points are relevant. E-text with amazing features, highlighting and flash cards are 5 stars.
