## Customer Reviews

This ebook is offered for free right now so at that price it's definitely a 5 star review. ....But even if it

wasn't, it would be at least a 4 star reviewing depending on the price. I really like this book because it's just like the title says...101 Super Fun Facts. My kids love Fun Fact books. The pictures are wonderful (at least the ebook ones that I see on my computer and iPad.) It would be nice if there were more photos. I would say this isn't a little kids picture book. It is perfect for my 2nd and 4th grader and I even had fun reading all the fun facts in this book too! One thing I like about this book is that some of the fun facts are more than just one....For example: A male dolphin is called a bull. A female dolphin is called a cow and a baby dolphin is a calf. They really could've considered this 3 fun facts but instead labeled it as just 1. You can click "Look inside" on the main product page on and see the first few pages of the book. This will give you a good idea of the format of the book. But here is an overview of what's in the book. The book is broken down into about 8 chapters. The first one is the introduction with about 17 fun facts. At the end is a conclusion (a paragraph long) about how humans are a threat to dolphins. All the chapters in between talk about different types of dolphin including the Atlantic spotted, bottle nosed and the river dolphin. So all in all a great book especially for free!! Janet Evans has other books 101 Super Fun Fact books that are offered for free as well. She has some about bears, snakes, spiders and sea turtles. I haven't read them all yet but they pretty much follow the same format. You can't go wrong if you can grab them for free. They are great to have on my iPad as quick reads or boredom busters.\*\*\*\*\* I received this book for free in exchange for my honest review. \*\*\*\*\*

My great nephew and I love to read together. He is five and absolutely adores learning books and quoting facts, already! I figured this series of 101 Super Fun Facts and Amazing Pictures books would be an excellent choice for us to enjoy together. I ordered the eBooks on each of these subjects: Snakes, Penguins, Sea Turtles, Spiders, Dolphins, and Dinosaurs. He loved each of these books. I thought we would just sit down and read all of these books, all in a row, but these are substantial books, so we did two per sitting/day and this worked out well for his age. Despite them being long books with a lot of information for a 5-year-old, he enjoyed them each and they held his interest the whole time, even with a bit of fidgetiness toward the end. He loved choosing the order we read them in and enjoyed each of the subjects equally as much as the others. These books could be written just for him and his interests. There is a lot of information in them and we both learned a lot. I can definitely see us revisiting each of these books over and over in the future, soaking up a little more of that info each time, which is excellent. I have a feeling he will be quoting the facts he learned in these books to his sisters and parents quite a bit.

Hi my name is Nick and I help homeschool my grand children, this book was for a second and third grader and was a perfect fit for them. I mean who doesn't love dolphins, except for the Son of Sam. Freaking wonderful book Dolphins: 101 Fun Facts & Amazing Pictures (Featuring The World's 6 Top Dolphins) Kindle Edition by Janet Evans I love the introduction, it is only 26 pages but this is plenty for the kids. Too much of one thing and their minds are blown for the day. The graphics are by far the best part of the book. My favorite dolphin is the bottle nose dolphin. They are the best looking lol. You have six kind of dolphins in the eBook. You also have about 16 pictures including the cover and the images are the best. To give you a small sample of my favorite dolphin it states; 32. This dolphin is the one usually found in aquariums and sea parks. These dolphins have also starred in TV shows and movies. There are many more facts on each dolphin but that was just a taste. If you want this for your child it is worth getting. I have not given Janet Evans five stars every time, but she deserves it here. I get products at a discount or free for reviewing them. I always give my honest opinion and you can see some of my bad reviews if you check my profile page out at [https://www..com/gp/profile/A3JKATD6PFKJGM?ie=UTF8&ref\\_=pd\\_hud\\_ya\\_pf](https://www..com/gp/profile/A3JKATD6PFKJGM?ie=UTF8&ref_=pd_hud_ya_pf) Thank you The Nickster

My kids truly enjoyed this book. We received this and a few other ebooks for free in exchange for an honest review of our opinion of them. We sat down and read all of the 101 books last night and this one was one of the favorites. The kids loved the pictures and I have to say that they were impressive. No cheap kid's book pictures. These could be in a magazine they are so well done. My biggest disappointment about this ebook was the mumbo jumbo that they added in about evolution. That dolphins used to walk on land and some other garbage like that. Evolution is still just a theory and has not been proven so to add it to a book for kids that is facts about dolphins is a bit ridiculous. Theories have no place in books of fact. Other than that though, I really found these to be highly educational for the kids since it teaches a lot of new words and it caused them to think of questions that needed answers, Like what is a pod. I'm always impressed by a book that gives kids a desire and ability to learn new words and things. I would recommend this book, just don't read the parts you don't like.
