Obstetrics/Gynecology

Pulmonary Coding Tip

If a definitive diagnosis has not been established to the end of the encounter, it is acceptable to report *acute* (acute) and/or *chronic* (chronic) as long as a definitive diagnosis. When sufficient clinical information is not shown or available about a particular health condition to assign a more specific code, the appropriate "unspecified" code (eg, a diagnosis of pneumonia has been determined, but not the specific type). Unspecified codes should be reported when they are the codes that most accurately reflect what is known about the patient's condition at the time of that particular encounter.

The inclusion of the ~ (dash) symbol indicates that an additional digit is needed. For example, *Acute bronchitis* (J40.~).
