Commercial Pilot Airman Certification Standards - Airplane: FAA-S-ACS-7, For Airplane Single- And Multi-Engine Land And Sea (Airman Certification Standards Series)

Synopsis

The Airman Certification Standard (ACS) is the guide for aviation students, instructors, and FAA-designated examiners to know what pilot and industry license applicants must know, do, and consider for their FAA Knowledge Exam and practical (checkride), in order to earn a certificate or rating. This edition (FAA-S-ACS-7) of the new ACS, which became effective June 2017, replaces the previous FAA Practical Test Standards (PTS) and it is basically an enhanced version of the PTS. It adds task-specific knowledge and risk management elements to each PTS "Area of Operation" and "Task." The result is a presentation that integrates the standards for passing both the FAA Knowledge Exams and the FAA Oral and Practical Exams in a way that coordinates the study and learning for both, making them relevant to each other. This Federal Aviation Administration (FAA) Commercial Pilot \rightarrow Airplane ACS provides the aeronautical knowledge, risk management, and flight proficiency standards for private pilot certification in the airplane category, single-engine land and sea, as well as multi-engine land and sea classes (ASEL, ASES, AMEL, AMES). This ACS incorporates and supersedes the previous Practical Test Standards (FAA-S-8081-12) for Commercial Pilot \rightarrow Airplane license applicants.

Book Information

Series: Airman Certification Standards Series

Paperback: 104 pages

Publisher: Aviation Supplies and Academics, Inc. (June 12, 2017)

Language: English

ISBN-10: 1619546051

ISBN-13: 978-1619546059

Product Dimensions: 8.2 x 0.2 x 10.7 inches

Shipping Weight: 8.8 ounces (View shipping rates and policies)
