Cancer: Step Outside The Box

Synopsis

Now in its 6th Edition (recently updated in 2014) and with over 150,000 copies sold since 2006, Cancer-Step Outside the Box is a "must-have" book that everyone should own. According to Dr. Rashid Buttar, author of The 9 Steps to Keep the Doctor Away, "Ty Bollinger's book, Cancer-Step Outside the Box, is an extraordinarily thorough and courageously well written book, brought to fruition by the dedication of a son for his departed parents. I found it difficult to put down this exceptional book once I began reading it and plan on recommending it to all my patients suffering from cancer who seek treatment at our clinic so that the light of truth and hope contained within this book can shine brightly on them as well." In the words of cancer survivor, Brad Matznick, "I am not a journalist, that's Ty's job, so I won't drag this out ... I am a cancer survivor and this book was a huge contribution to my survival (it's one of the best books on the subject). Ty is a rebel... maybe even somewhat eccentric, but you can't ignore what he's saying. Read this book if you or someone you care about has cancer ..." said. With satisfied readers in over 50 countries worldwide, Cancer-Step Outside the Box is a roadmap to successfully treating cancer and regaining your health! This book is chock full of the most effective, non-toxic cancer treatments in the world. Truth be told, there are many potent and well-proven alternative strategies for preventing and treating cancer... without surgery, chemotherapy, or radiation (the "Big 3"). Inside this book, you will find a wealth of information that your doctor probably does not know. Here's why: while at medical school, doctors learn a very drug-intensive style of medicine, because multinational pharmaceutical companies ("Big Pharma") funds the medical schools. As a result, most doctors are still thinking "inside the box" when it comes to cancer treatments. The "cancer box" is largely the creation of Big Pharma attempting to peddle their poisons (such as chemotherapy) in an effort to increase shareholder profits. Sadly, these profits are generated at the expense of cancer patients. In the words of radio talk show icon, Jeff Rense, "I have been involved with so called 'alternative approaches to cancer' for a long time. This book is 'the Bible' - buy it and you will be amazed. It is a masterpiece." This book succinctly explains the facts and deceptions about cancer and cancer treatments, it documents multiple cases of persecution and suppression of effective natural cancer treatments, it details the most potent advanced cancer treatment protocols, and it clearly explains the relationship between nutrition and cancer. According to Dr. Irvin Sahni, M.D., "I found this book to be absolutely amazing. I am a practicing physician in United States. The fact that Ty Bollinger does not have formal medical training only makes it that much more impressive. I have recently been

interested in nutrition, and Ty's section on nutrition in this book nearly constitutes an entire separate publication on its own. As a medical doctor, I can tell you that his facts are spot on ... I would recommend this book to anyone who has cancer, anyone who has a family member with cancer, or anyone who's interested in promoting health in their own life to try and prevent cancer. This book will open your mind and nourish your intellect. —

Customer Reviews

Cancer: Step Outside the Box is definitely a book everyone should read. Ty explains his plight and how he came about to write this book. It contains his search for all things natural, non-harmful in one place in helping people to make a choice and feel empowered. I had no idea that all these alternative treatments were out there. Many thanks to you Ty!!! Bless you for the work you've done and sharing with the world. Also, I watched his 9 episodes of The Truth About Cancer: A Global Quest, which is a must see.

Reading it won't do the job, you have to follow through with his recommendations. It could save your life or give you a lot more time.

LOVE THIS BOOK!! I'm an ICU RN, now retired and recommend this book to everyone on Facebook. Anyone who has cancer should read this book.

This book is for real. Chances are better than 40% that the you will become a "cancer victim" long before you're supposed to die based on actuarial tables. When the day comes that you or your

partner are diagnosed and offered the three options available in America's FDA-controlled Standard of Care Oncology System, buy this book and read it cover to cover because after you're all through being "treated" chances are in the 80 percentile that your precious cancer will be there to haunt you again but perhaps AFTER their "five year" time period that they like to toss around as being the time within which to determine if the treatment was a success or not-as-successful-as-they-hoped-for. .They call it "recurrence" but actually, they never improved the bio-terrain in which cancer grew in the first place and this important fact is still not on their main menu as of 2017. However, there are peeps and squeaks from the allopathic groups of late that hint of "immunotherapy" but see if you can get immunotherapy BEFORE they zap, cut and fry your immune system. The answer is no way Jose! So the best plan for all of us because the incidence of cancer is growing rapidly and since each of us knows (or knew) at least 3 people who "had cancer" or died of cancer is to know what other options are out there. Ty Bollinger has prepared a valuable treatise on this topic. . These are numbers from their own playbooks. Not fabricated or guessed at for the sake of hyperbole.

The Truth about Cancer is one of the MOST informative and amazing books I have EVER read. It was recommended to me by a nurse who works at MD Anderson Cancer Center in Houston. My mother in law was just diagnosed with cancer and it seems like everyone I know either has it, knows someone who has it, or unfortunately has Lost someone they love to cancer. The book is very easy to read and comprehend and starting in Chapter 10 you LEARN HOW TO CLEANSE Your body and it is outlined why, how and what is recommended. I give this a 5 star review because the option to rate it higher wasn't available. If you care about nutrition and how to REVERSE DISEASE, then this is a MUST READ. HATS OFF TO Ty Bollinger for writing this book. Big Pharma would probably prefer it wasn't on the market.

Great book full of information not only for cancer patients but for everyone. It has a tremendous amount of information on healthy, natural living that combats illness with earth supplied remedies. Very well put together and it comes from a Christian author.

I bought his other book Truth about Cancer and this one. Both are excellent. I prefer this one because it is more in depth and has much more info in it. Even if you don't have cancer, you should read this book so you can improve your health and so you can avoid getting it. 1/2 of all males and 1/3 of females will get cancer so it is important to read this book before you get it! In this book, you will learn about alternative treatments to chemo. Chemo has a 2.1% success rate 5 years later!

Hence, it is very important to learn about alternative treatments. Chemo is also derived from mustard gas!! This book discusses the drawbacks of chemo.

Hi,Best cancer book I've ever read. Direct and to the point, no mincing of words. You want help? Here it is!! read only to the section about B-17, placed the book down, and ordered 4 more books to give to friends and family. If you care about anyone, this is THE gift to give them. No one should die in tormented pain and lose their dignity, all for the sake of making a profit for the 'Cancer Industry'!What more do you need to know than what Dan Rather said on a live TV news show about 20 years ago, "If a cure for cancer was found, the US economy would crash".? This crash applies to oncologists, surgeons, hospitals, prescription companies (pain, nausea from chemo), government strictly run Hospice/euthansia program, all 'charities' who try to drain every last cent you have while they are 'still looking for the cure since the 1700's') and chemo/radiation (which is sure to cause you to lose your most valuable asset, your immune system. No wonder the internet is hated and feared!My Mother died of 'breast cancer' in 2005, and the apathetic care she received was despicable and disgusting. She asked for NO chemo or radiation. After she died, I had time to think, and googled her oncologist's monthly IV 'for her bones'. I was horrified to find out it was chemo! We tried everything, probably too much, and while her oncologist said, Don't tell me what you are doing, later he asked, What are you doing? At one point we had Mom's blood cancer marker down to nearly normal, we think with B-17. However, we could not overcome the unknown dastardly effect of chemo, which I think caused her immune system to crash. She did not die of starvation, or cancer but an immune system crash (2nd round of shingles). I asked Mom, when she could barely talk, How much is your pain scale on a scale of 1 to 10? She said emphatically, "Twenty"!!Ignore all trolls and buy this book! This is a genuine lifeline!!Jean Baugh
