Scientific Computing (de Gruyter Textbook)

Synopsis

Nowadays most mathematics done in practice is done on a computer. In engineering it is necessary to solve more than 1 million equations simultaneously, and computers can be used to reduce the calculation time from years to minutes or even seconds. This book explains: How can we approximate these important mathematical processes? How accurate are our approximations? How efficient are our approximations?

Book Information

Series: de Gruyter Textbook

Paperback: 138 pages

Publisher: De Gruyter; 1 edition (May 19, 2015)

Language: English

ISBN-10: 3110359405

ISBN-13: 978-3110359404

Product Dimensions: 6.7 x 0.4 x 9.4 inches

Shipping Weight: 8.5 ounces (View shipping rates and policies)

Average Customer Review: 4.4 out of 5 stars 3 customer reviews

Best Sellers Rank: #710,451 in Books (See Top 100 in Books) #44 in [Books > Science & Math > Experiments, Instruments & Measurement > Microscopes & Microscopy](#) #477 in [Books > Science & Math > Physics > Mathematical Physics](#) #595 in [Books > Science & Math > Mathematics > Mathematical Analysis](#)

Customer Reviews

Timo Heister and Leo G. Rebholz, Clemson University, USA.

as expected

Easy to read, and the coding is explained well.

I'm not sure if this book is not the most helpful or my teacher is insane.
