Age Range: 6 and up

Grade Level: 1 and up

Customer Reviews

For over 35 years, School Zone has been an innovator in children's educational products. School Zone creates a wide range of educational resources to support every curriculum.

Very happy with this product. I wanted something to keep my daughter from falling behind over summer between Kindergarten and 1st grade. This was perfect.

This is a great "big book" for review and skills reinforcement over the summer. As a curriculum specialist, I can see where improvement is needed, but I think the authors tried hard to create an inviting, comprehensive resource for building skills in reading, writing, critical thinking, math, science, and other language arts, with ethnically diverse characters and contemporary themes. My granddaughter, who is 6 and going into first grade, uses this book frequently and skillfully in guided

lessons and independent work. School Zone staff, your publications deserve error-free excellence. There were too many errors in grammar, sentence structure, and punctuation. I am a technical writer, curriculum specialist, and professional editor. Another set of "eagle eyes" can help you avoid publishing substandard presentations.

My son and I work in this book daily. Great refresher as he is going into the 2nd grade next year and I want him to obtain what he learned in the 1st.

My kindergarten aged child likes the colors and the activities in this book. He understands most of the material.

My child loves to work in this workbook. This will help her stay up to date during the summer before 1st grade.

My little one loves this book. It makes learning fun which it should be especially at such a young age. The book teaches different skills such as math, reading and spelling by using different activities so the kids are getting practice but not doing the exact same thing every time. Something as simple as connect the dots helps them visualize number orders. We are using this book in conjunction with what the teacher is teaching at the time so that it helps reinforce their lessons, and helps show other ways to do it.

My 6 year old loves this book. We took it on a trip and she was kept entertained for many days. It's fun to see what she can accomplish and I like that the book breaks up the work into different sections such as math and reading.

I am very pleased with this book. It is preparing my 6 year old for 1st grade. Plenty of activities for her to practice and do. I recommend this book to any child starting 1st grade. I also love the fact that the answers are on the back of the book.
