For Flower lovers of all ages, Flowers cleverly arranged and gathered together into 50 captivating designs! The designs fluctuate from very simple to intricate, and are just waiting for you to color them with Gel pens, Colored pencils, Markers, or even crayons on some of the simple designs. Just add bright and bold colors like reds and purples full of energy or use soft pastels for tranquility, your choices are endless. This book will inspire your imagination, stimulate your senses and creativity, and as you become engaged in the enjoyable activity of Coloring, it calms you and almost immediately starts reducing your stress level. I love to use Bic Mark It ultra fine markers to color in this book they come with 36 different colors and a case that is cheap plastic but works well for organizing the markers in color wheel order, the last one below is colored with these. This book is a perfect addition to your coloring library, a perfect gift for children, college students, or adults who enjoy coloring, and a much easier way to reduce stress than going to the gym.

1. 50 Illustrations printed one per page (the back of each page is blank) on light weight, bright white paper.
2. Place a piece of scrap paper behind the page you are coloring and leave until the picture is completely dry. Markers and some Gel Pens will bleed through.
3. For Flower lovers of all ages, my grandchildren both boys and girls love coloring in this book and taking a picture of flowers to Mom.
4. I use this

book to teach my Grandchildren basic color theory with a color wheel (available on) Example :(Using complimentary colors, those across from each other, Red and Green or Blue and Orange or Yellow and Purple, will make the flowers burst off the page.)5. I love coloring in this book, there is just something about coloring flowers that is soothing, add a flower scented candle and you will be rejuvenated.Cons:The paper is thin so if you use Gel pens or markers you must put a piece of scrap paper behind the picture you are coloring and leave it until your picture is dry OR remove the picture from the book.

I was a big fan of Jenean's quilting fabrics, so I was thrilled to see she has a line of coloring books! This is the first one I purchased and I have used it a LOT! It has a nice variety of intricate and simple designs. Some fill the page, so are centered motifs (see my photos). My 12 yr old daughter loves it too, so it is great for all ages.For the more intricate designs, I've used the Stabilo 68 & Stabilo 88. I've also used Prismacolor Premiers and Crayola Extreme Neons too.

Wonderful pages to color. Some are very intricate and some are a bit more simple. Designs are printed on one side of the page. The paper quality is very good. I've used markers, gel pens and colored pencils to color the designs. You will get hours of enjoyment from coloring in this book.

This is my first "adult" coloring book and after spending a ton of time researching the different ones on , decided this one would be a good one to start with. I haven't started coloring in it yet, but the quality is excellent and I love all the pictures. I will definitely be purchasing more from this author in the future. I'm planning to use the Stabilo 30 point 88 Fineliner markers (lots of research on the markers as well!). I'm not sure if the pages will bleed but I do plan to put something behind the pages just in case. There is only one picture per page (not double-sided) so that means you can use any pen/pencil/marker you want. I even like the spine of the book. The stripes continue from the front left to the back so if you had quite a few of these they would look pretty cool on a bookshelf. Weird observation, but still. :) I'll update again once I've actually colored in it. :)Update: 5/22/15: I've had this book since July 2014 and have only colored two full pages. I don't get to it as much as I wanted to, but it also takes quite a while to finish one page. I think these pictures might be too detailed for me. I'm still not sure about the markers I've decided to use in this book either. I'm using the Stabilo Fineliner markers and they don't seem fine enough. I've considered other options like the Bic but I'm not sure those would be much different. We do have the Sharpie ultra fine pens but those aren't as sharp as the Stabilo. The pages do bleed so I put a manila folder behind the page

I'm coloring. I'm not going to knock down any stars because I still think this is a high quality book and I think it's a good value, but since each page takes so long to color I may look at other options in the future. I like to get the pictures finished so I can see it finished and move on to the next.

I've bought this one 3 times. Twice for myself and once as a gift. I have all books by Jenean and they are all amazing!! Get them all! Even multiples of them because the coloring options are endless.

I love the designs in this book! The only thing I wish was different is the thickness of the pages. I like to color with markers and the pages are kind of thin so the markers bleed through to the other side.

I received my Flowers Designs color book. It has been keeping me busy and my mind off of things. It seems when I start coloring that my mind (finally) goes blank and I can exhale and relax and just color and not have ten thousand thoughts rushing through my mind. Very good for highly sensitive Empaths.

Love this coloring book! Provides the stress relief I need while allowing me to be creative. I use mostly ultra fine point Sharpies, but love the contrast that highlighter markers make.
