## Synopsis

"He who knows others is wise; he who knows himself is enlightened." - Lao Tzu

## **Customer Reviews**

This booklet is poorly written and edited and includes extremely basic information only. The author does not know how to write a book. I think he's just a casual blogger. Just search the internet and you'll get more valuable information. Save your money.

Poorly, or not edited. Full of typos and grammatical errors; NOT full of helpful information.

It is okay... nothing new about mindfulness in this book, for beginners might be ok

A must read for anyone who is just stressed out with a racing mind. It is especially good for those who tends to think of their past, good or otherwise. The author gives helpful and easy to learn tools so, that we can be mindful in the present moment.

This short document reads like a short pamphlet usually found in a doctor's office. You will find only basic information, something you can learn by reading the introduction of longer book by a real author on the topic. You won't be able to start practicing real meditation with just reading this document. You'll end up buying another book on this topic to get started. Save your money and invest on a better book.

Great read for anyone .

The book is thinner than I expected. It doesn't have that many pages inside because I was expecting it to have more.

Ok
