"So, what's my verdict on Earworms language lessons? As the Dutch say, 'heel goed!' (Very good!)" --Wired, praise for the series

Earworms MBT is an accelerated learning technique that takes a new and innovative approach to language learning. Based on the science behind catchy songs that become stuck in one's head (the auditory cortex), Earworms works by pairing melodic music with soft-spoken foreign words, phrases, and their translations. The result is an incredibly effective method for learning conversational foreign languages by simply listening. Marlon Lodge, the founder codirector of Earworms Learning, is an author, linguist, and language trainer of many years' experience. He lives and works in Dusseldorf.

This is a nice supplement for someone trying to learn french on their own, or for someone who took or is taking French lessons in school, etc. The French woman on the discs has an accent that will make you more comfortable about the There are a few grammatical situations that it would be nice if the speakers elaborated on, however, otherwise I have only 3 issues with this set....1. Some of the music is good, while some is just annoying. They are all really catchy, though, which is kind of the point.2. This is British English, not American English, so there are a few terms mentioned that someone not familiar with British English might not understand right off the bat.3. The two speakers tend to address each other informally, when you should really be learning to address pretty much everyone you meet formally. They even mention this, but then proceed to continue using the informal way. Very annoying.

would have liked a book with the CDs

good product

Such a fun way to learn French! Relaxing, engaging, practical. So fun to parler français! I speak ALOUD with the recording while driving or cooking or doing whatever. With the music in the background, it feels like a sing-along. Highly recommended! Give it a try! Especially if speaking French has been a challenge. It'll help you loosen up and start speaking!
