ISBN-10: 1259643360

ISBN-13: 978-1259643361

Product Dimensions: 8.5 x 0.9 x 10.8 inches

Shipping Weight: 1.6 pounds (View shipping rates and policies)

Average Customer Review: 4.3 out of 5 stars 25 customer reviews

Best Sellers Rank: #38,895 in Books (See Top 100 in Books) #69 in Books > Education & Teaching > Higher & Continuing Education > Test Preparation > SAT #272 in Books > Education & Teaching > Test Preparation > College & High School #484 in Books > Textbooks > Test Prep & Study Guides

Customer Reviews

Christopher Black, MA (Greenwich, CT) is the founder of College Hill Coaching and author of McGraw-Hill's SAT Mark Anestis, MA (Hamden, CT) is co-author of McGraw-Hill's SAT, and author of 5 Steps to a 5 on the AP Biology Exam.

I love the McGraw-Hill SAT prep books, and they're books that I use again and again. I've been tutoring the SATs for over 10 years and have used a variety of books from a variety of publishers

but the McGraw-Hill ones are the ones that I come back to year after year. The questions are very similar in structure, tone, and difficulty to what students will face on the real SAT, and these six SAT practice tests are a great resource for students who know and understand all of the basic reading, grammar, and math concepts but just need more practice or to get more comfortable with the test and the length of each section, as well as the test as a whole. I also appreciate that the paper is a little thicker than what I've seen in some other publishers test prep books which makes it easy for the students to write in and to work directly in the book. If you've already exhausted all the free practice tests offered by the College Board this is a great next step for students preparing for the SAT.

Uses passages from KALLIS prep review book. Writing sections were nowhere near the quality of the actual test. Overall, this book is not a good representation of the actual new sat.

Good

Wish there were more tests in the book, but overall pretty accurate for test prep.

good

Wrong answer for math question 21 on page 219. The answer explanation is correct but there is a mathematical error. $41 = x + x + 32 - x$ $73 = x$ $x \geq 23$. Initially I was scratching my head then I realized the mathematical error. Math questions looks little harder than college board practice test.

I scored in the top 0.5% on the SAT and 0.1% on the PSAT. I credit reading a book a week, and my high school math teachers' morning practice SAT questions. I taught the SAT for a time after college, and know that tutoring companies emphasize strategy over comprehension. If you do not have access to instructors, a practice book is definitely the second best option. McGraw Hill do not list actual test questions, but the construction of questions is similar. This book offers vetted strategy similar to those from the major tutoring corporations. Have your child read the strategies like it was for a test, and make sure they know it backwards and forwards. Then have them take the tests under real timed conditions. After each test, have them do an autopsy of each missed question. Repeat six times, and you will undoubtedly improve over their original scores .

This exercise workbook for the SAT test provides six full SAT tests, each having two Reading, Writing and Language sections; two Math sections; and the optional Essay section. Since the spring of 2016, the SAT has been redesigned, and the scoring system returned to the 400-1600 point scale I remember during my own tests in the '80s. This McGraw-Hill test book provides a great Section I overview of the twelve primary differences and changes between the current SAT and the pre-2016 version, as well as explaining the primary skills assessed, the scores reported, how colleges may use the scores, and how best to prepare. They even suggest reading lists (College Hill Coaching Power Reading List) with numerous titles provided, and online sites and periodical publications that will assist the student in gaining exposure to "big ideas" and in developing critical and analytical reading skills. McGraw-Hill has also provided a link to their free Test Planning App, which allows your student to input a study schedule based on their test date, and sends daily or weekly reminders for study. Apparently, the College Board has partnered with the Khan Academy to offer online video tutorials in select key topics as well, which was a great tip. This is a very good primer and practice booklet for the SAT. If your student applies themselves as suggested in this book and takes the tests, they will certainly improve their study skills and habits in addition to gaining valuable substantive knowledge and practical test-taking skills.
