Object 15: Works By Kilian Eng

Synopsis

Object 15 is the third collection in Kilian Eng's successful monograph series, following the acclaimed books Object 5 and Object 10. Kilian's images present alternate worlds where the environment plays a great role. Many of these sequences present visual stories, without any text. He is fascinated with the details that can create these imaginative worlds: colors and lighting; dimensions and sounds. His inspiration comes from classic and futuristic architecture, surrealism, and science fiction as well as natural and urban landscapes. "Since most of the work in the book has been drawn in the computer environment I was glad and surprised how the images opened up in a new way when I saw them in the printed form. There is definitely something happening when you can see the work on paper instead of on the screen. It is really the ultimate way to look and get to know the artwork." Kilian Eng is one of the most popular and acclaimed digital illustrators working today. His prints of dreamy landscapes and his retro-futuristic style are admired by many. He is known for his Mondo poster series, designing posters for Game of Thrones, Argo, Jodorowsky's Dune, and Sony PlayStation. He has also designed many acclaimed album covers including soundtracks for Aliens, Oblivion, and The Knick. Kilian earned a Bachelor's and Master's in Graphic Design & Illustration from Konstfack University of Arts, Craft & Design in Stockholm and has won numerous awards for his illustrative work.

What an absolutely beautiful collection of art. Kilian Eng is a modern master of creating new and intriguing worlds. I can't wait for more of his work!

A wonderful collection of posters for science fiction and fantasy movies that were like Star Wars cult mega hits in some parallel universe but only exist in someone's imagination in this reality. And that someone can now be you.

Amazing sci-fi art in the vein of Moebius. Retro sci-fi, you won't find any cheap cgi here. This is a master at his craft.

Beautiful art and design. I love the full page illustration layout.
