Customer Reviews

The Night Sky, An Introduction to Prominent Stars and Constellations, is a must-have reference guide for any stargazer. This indispensable guide highlights prominent constellations that are visible from cities throughout North America in summer and winter. Glow-in-the-dark star charts allow easy identification of shapes and names of prominent constellations. The Pocket Naturalist series is an introduction to common plants and animals and natural phenomena. Each pocket-sized, folding guide highlights up to 150 species and most feature a map identifying prominent sanctuaries and outstanding natural attractions. Each is laminated for durability. (31/2 X 81/4 folded, opens to 22 X 81/4, color illustrations, charts)

James Kavanagh is the author of more than 300 pocket guides on nature, science, travel, and

languages. He lives in Phoenix, Arizona.

Keep in mind this is a pamphlet and not a book, so the information is limited. That being said, it is easier to carry around than a book. The glow in the dark stars is a nice touch at night. Overall, the product is great, waterproof coating makes it almost indestructible.

This is a very basic star chart, with some supplemental information about the constellations. It is well made and nicely coated. It is not designed for serious observing or star-hopping. Probably a great tool for teaching kids.

My daughter, grandchildren and I all enjoyed the two copies I bought. Useful in the field, kids love the glow in the dark aspect!! I live in NC and family are in CO works well in both places!

not much there

fun pamphlet to teach others.

Thank you

Extremely informative and easy to follow. Great way to learn the star system in the sky

Awesome little reference sheet! Fits my needs!
