Read every word.

Overall, a great quality hard cover book which offer's many unusual and weird settings for your Numenera players to discover. The first section deals with objects and places that are near Earth such as the moon, Mars, etc. and how you can pull off getting your characters to said locations. The next section deals with things farther out in the solar system such as an abandoned space ship or floating cities in a gas giant; the last section has some truly bizarre settings in the Milky Way and beyond such as psychic constructs around a black hole, megastructures, etc. Near the end of the book you have a small selection of one page alien planets and an adventure hooks as well as a small selection of alien creatures. Very creative and you can always use many of the ideas in other RPG's as well such as Traveller.
