Skin Cancer: New Research (Horizons In Cancer Research, Volume 31)

Synopsis

Three types of skin cancer account for nearly 100 per cent of all diagnosed cases. Each of these three cancers begins in a different type of cell within the skin, and each cancer is named for the type of cell in which it begins. Skin cancers are divided into one of two classes - nonmelanoma skin cancers and melanoma. Melanoma is the deadliest form of skin cancer. The different types of skin cancer are: Basal cell carcinoma (BCC); Squamous cell carcinoma (SCC); Melanoma. All other skin cancers combined account for less than 1 per cent of diagnosed cases. These are classified as nonmelanoma skin cancers and include Merkel cell carcinoma, dermatofibrosarcoma protuberans, Paget's disease and cutaneous T-cell lymphoma. This book examines the latest research in this field.

Book Information

Series: Horizons in Cancer Research (Book 31)

Hardcover: 198 pages

Publisher: Nova Science Publishers; 1 edition (January 1, 2007)

Language: English

ISBN-10: 1600210961
