Customer Reviews

If you're a high net worth individual looking for ways to reduce your taxes, particularly when selling a non-security asset subject to large capital gains tax, this book is for you. The author describes a brilliant solution that many tax professionals never even heard of but is effective. Its not for everyone but it can save some people a ton of money.

Great book to help a challenging time in a dentists career.

"Reading Wes's book is an eye-opening experience! This book explains what must be done to make a substantial and positive difference in the amount of annual income tax paid - perhaps even

resulting in 100's of thousands of dollars saved over several years of using these little-known strategies. I love it that these strategies have been hiding in plain sight inside the tax code all along and come from either tax law, tax court cases, or the IRS's own official publications. No funny business. The book is an easy read, written in a conversational tone, and addresses all the normal concerns that come up when discussing such a dry and potentially problematic area such as tax reduction. Wes's book shines a much needed light on these unknown tax strategies and teaches you what to do to take advantage of them. The cost of not educating yourself about these strategies is just too high! I can think of no other way to make such a quick, large, and lasting impact on your long term financial security! My recommendation: Get the book. Educate yourself. Hire Wes and TaxVantage Consulting. Keep more (sometimes much more) of what you have worked so hard to earn! Jeffrey Janson, CFP, AIFA

I've had the pleasure of witnessing how Wes's strategies have resulted in amazing tax savings for my friends, clients and their families. His expertise, insight and thoughtful explanations have helped my clients and their accountants navigate the complex tax code using sophisticated strategies that are managed in a simple and easy way for the client. Wes also has a unique ability to communicate his strategies to other tax experts, and when they realize the power and authority of his tax planning methods their enthusiasm cannot be understated. I strongly recommend you check out Wes's book and consider having Wes partner with you and your own tax advisors to uncover efficiencies and start paying less taxes today!

If you or your clients are tired of overpaying your taxes and you're getting crushed by taxes because you make over \$500k per year, this book reveals the truth about being able to pay less - a lot less - and why doing so isn't "too good to be true." And it's written in a way that anyone can understand it!

If asks why I canceled my Kindle Unlimited subscription I will certainly mention this title by name as an example. I would be seriously pissed if I spent any money on this "book". It has *ZERO* information and it was a complete waste of time to even download. The 5 star reviews are obviously FAKE.

This is just a pitch for his business with no tangible information. This book is just a gigantic advertisement for a tax service. Save your money and don't even consider if you earn less than 500k a year.
